

Family Constellations

*Systemic work to gain insight
into the deeper causes of personal issues*

Family constellation therapy is a short-term group intervention that helps clients discover and address patterns and conflicts within their energetic familial groups.

When we examine our feelings and perceptions in an "energetic field of knowing," there is a possibility to break out of familial (any energetic connection to you or the subject) patterns that cause blockage or suffering.

Working through your family constellation with this type of therapy may help you find the cause of long-term conflicts within yourself and the energetic and emotional ties that relate to the subject.

April 18 - 20, 2025
